

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION IV

345 COURTLAND STREET, N.E.
ATLANTA, GEORGIA 30365

MEMORANDUM

DATE: JUN 23 1992

SUBJECT: Medley Farm Superfund Site
Cherokee County, South Carolina
Review of Remedial Design (RD) Work Plan

FROM: Ralph O. Howard, Jr. *Ralph O. Howard Jr.*
Remedial Project Manager

TO: Addressees

Attached for your review and comment is the RD Work Plan for the Medley Farm site. The other associated plans, the Field Sampling and Analysis Plan, Quality Assurance Project Plan, and Health and Safety Plans, are not included as they were reviewed by your offices this past March.

The remedy at this site includes soil vapor extraction (SVE) in the remaining residual source areas in site soils, and extraction and treatment of site groundwater. Because there is no sewer or water treatment works in the area, the treated water will be discharged to either: 1) a nearby but offsite creek (NPDES), or 2) an onsite tributary to the creek, or 3) possibly some other option. The contractor for the PRP Steering Committee, RMT Inc., has taken some initial steps toward applying to the State for the permit.

Please review the documents and comment as necessary. I ask that you have your comments to me no later than Friday, July 17, 1992. If there are questions, please call me at (404) 347-7791.

Addressees: Dave Hill, Water Div, GW Technology Support Unit (2)
